Mr. JAMES ALBERT G. OBISPO

Dean, Office of Student Affairs
Piccio Garden, Villamor, Pasay City

Good day,

We are currently conducting interviews as part of our capstone research entitled
“Web-Based Event Management System with Machine Learning-Based Facial Attendance for Student Organizations.”

The purpose of this interview is to gather relevant information and gain a deeper understanding of the current processes, practices, and challenges in managing student organization events. In this regard, we would like to respectfully request your participation in this interview. Your insights and experience will greatly contribute to the success and accuracy of our study.

Set of Questions

1. How are student organization events currently approved by the Office of Student Affairs?
2. What is the current process for recording student attendance during organization events?
3. What tools or methods are currently used to track attendance (e.g., manual sign-in sheets, QR codes, digital forms, etc.)?
4. What challenges or problems does the OSA encounter in the current attendance monitoring process?
5. How does the OSA verify that the recorded attendance is accurate and authentic?
6. How are attendance records stored and managed after the event?
7. Who is responsible for monitoring and validating the attendance of students during events?
8. Does the OSA require attendance reports from organizations after every event? If yes, what information is usually included in the report?
9. Do you think the current attendance system needs improvement or automation? If yes, what aspects should be improved?
10. Would a system with automated attendance tracking, such as facial recognition, be helpful for OSA in monitoring student participation?

Open-Ended Questions

1. In your opinion, what features should be included in a system that manages student organization events and attendance?
2. What problems do you usually encounter with the current manual or existing system?
3. How do you think technology can help improve the management of student organization events?
4. What reports or information would you like the system to generate automatically?
5. Are there any additional suggestions or recommendations you would like to share for improving the current process?

Thank you for taking the time to answer these questions. Your responses and insights are highly valuable to our study and will significantly contribute to the development and improvement of our proposed system.

The information gathered from this interview will be used strictly for academic and research purposes as part of our capstone project. All responses will be treated with utmost confidentiality and respect.

We sincerely appreciate your support and cooperation in helping us complete our research.

Respectfully yours,

Bautista, Louie Michael L.
Samonteza, Joshua Gabriel C.
Viola, Paul Jaira O.
